Education

- **Schooling (CGPA 9.4)**
  National Hill View Public School
  Mar 2016

- **PUC (80%)**
  MVJ PU College
  May 2018

- **B.E - Computer Science & Engineering (GPA 8.4)**
  Dayananda Sagar College of Engineering
  Jul 2022

Summary

- Skilled Frontend Engineer with 1.5+ years of experience building responsive user interfaces.
- Proficient in **HTML, CSS and React (JS/TS), Redux** with good knowledge of version control with **Git** and **AWS** cloud services.
- Worked on multiple projects with strict timelines of turning designs into responsive, user-friendly interfaces.
- Passionate about creating exceptional user experiences and always open to learn.

Work Experience

Frontend Developer, InfinityBox, Bengaluru
August 2022 - Present

- Collaborated with designers & backend developers to develop frontend user interfaces for several simple & complex web applications using **HTML, CSS and React (Material UI)** that met product requirements.
- Got exposure to **Redux toolkit, Typescript, AWS cloud services** & numerous *React libraries* to build unique features and write & deploy efficient & maintainable code.
- Worked on **external client projects** to translate intricate UI design to user-friendly web/app interfaces.
- Collaborated closely with the company **CTO** and **founders** to develop products, which attracted clients like **Swiggy** and **Zomato**. This eventually **earned me recognition** for consistently delivering high quality results.

Software Engineer, Privafy Technologies (Internship), Bengaluru
September 2021 - March 2022

- Built a feature rich **e-commerce frontend** using React.js with contexts and API integration.
- Worked on a React based frontend project that involved building a *faceted search* table functionality with specialised design & display chips [as part of a **dashboard UI**].
