SUMMARY

Frontend engineer with **4+ years** shipping web and mobile products in **React, React Native and TypeScript**, working across the stack in **Java (Spring Boot)** and **Python (FastAPI)**. At Engati, building **AI agents for customer experience** — work that reaches **100+ businesses**, incl. an AI assistant in production at **Edelweiss**. Earlier built tools used by teams at Swiggy and Zomato. Promoted to Senior in **10 months**.

SKILLS

Frontend: React, TypeScript, JavaScript, Redux Toolkit, HTML/CSS, Tailwind CSS, Material UI, Framer Motion

AI Engineering: AI agents, Gemini, LLM tool calling, prompt engineering, CX automation

AI-Assisted Dev: Claude Code, Codex, AI pair programming

Mobile: React Native, Android Studio, Xcode

Backend & Cloud: Java (Spring Boot), Python (FastAPI), Redis, AWS, SQL, MongoDB

Design & Tools: Git, Figma, Photoshop, responsive design

EXPERIENCE

Engati Technologies — Bengaluru

Mar 2024 – Present

Senior UI Developer (Jan 2025 – Present) · UI Developer (Mar 2024 – Jan 2025)

- Pulled in at short notice to land Engati's **RCS channel** — a Google-facing launch on a hard external deadline that opened a new revenue stream — and **shipped a working frontend in ~10 days**; went on to own its architecture and reusable component structure across broadcast, template-message and template-creation flows.
- Built **Ellie**, a custom AI assistant live on Edelweiss's site handling **hundreds of customer queries a week** — owned the frontend end to end and built into its **Python FastAPI** backend (Gemini calls, tool calling, Redis caching).
- Unblocked go-live for **Edelweiss**, a high-value enterprise account, engineering previously unattempted UI customizations in custom JavaScript/CSS as technical point of contact for implementation and CSM teams.
- **Promoted to Senior in 10 months**; selected for Engati's **bar-raisers program** and the go-to engineer for frontend architecture and code reviews on a small, high-ownership team.
- Expanded into full-stack delivery with backend work in **Java (Spring Boot)** and **Python (FastAPI)**, aligning API contracts and shaping end-to-end architecture decisions.

InfinityBox — Bengaluru

Aug 2022 – Jan 2024

Software Engineer, Frontend

- Owned the frontend of InfinityBox's platform — including the operations dashboard and customer flows **teams at Swiggy and Zomato** used during partner collaborations — working directly with the CTO and founders.
- Delivered across web (**React**) and mobile (**React Native**), from Figma handoff to production deploys on **AWS**.
- Translated intricate UI designs into responsive interfaces across external client projects on tight timelines.

Privafy Technologies — Bengaluru

Sep 2021 – Mar 2022

Software Engineer Intern

- Built a feature-rich e-commerce frontend with **React**, Context API and REST API integration.
- Developed a faceted-search dashboard table with custom filter chips and specialised display logic.

AWARDS & RECOGNITION

- **Ownership award, Engati** — for driving the RCS channel launch to go-live.
- **Two monthly company awards, Engati** — for Ellie, and for moving a Google Sheets integration to Drive Picker.
- **3rd place, Engati internal thinkathon.**

EDUCATION

B.E. — Computer Science & Engineering · GPA 8.4

Dayananda Sagar College of Engineering, Bengaluru

2022
